1. General. The Consolidation and Containerization Point (CCP) and CONUS Freight Distribution Center (CFDC) codes identify activities which have been established by the Services and DLA to consolidate cargo for onward overseas or within CONUS.

a. The CCP codes are used for overseas shipments. These codes are structured like the CONUS water port identifier codes and are used on MILSTRIP documents to indicate the shipment routing. The first position of the three position code represents the geographic area in which the CCP is located. The second and third positions identify the specific CCP within the geographic area. Activities tracing shipments routed through a CCP cite the code in the POE field and send the tracer to the MTMC area command in which the CCP is located.

b. The CFDC codes which are in the 500 to 599 series, are used for CONUS shipments. Activities tracing shipments routed through a CFDC will use this information in conjunction with the instructions contained in the DTMR (reference j.) .
